EDUCATION

SNS College of Technology	Coimbatore, India
B. Tech. Artificial Engineering and Machine Learning	September 2024 – Present
Baptist Academy	Coimbatore, India
High School – Percentage: 87%	June 2023 – Mar 2024

SKILLS SUMMARY

- Languages:** Python, SQL, C
- Machine Learning & Data Science:** Supervised & Unsupervised Learning, Regression, Classification, Time Series Forecasting, Exploratory Data Analysis (EDA), Feature Engineering, Model Evaluation, Train-Test Split, Cross-Validation
- Deep Learning:** Neural Networks, LSTM, CNN, TensorFlow, Keras
- Libraries & Framework:** Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn
- Developer & Data Tools :** Jupyter Notebook, Visual Studio Code, PyCharm, MySQL, SQLite, Excel

EXPERIENCE

AI ENGINEER INTERN VACAPAY	DECEMBER 2025 – MARCH 2026
- Developed a deep learning–based cattle identification system using muzzle biometrics. - Built a YOLO-based detection pipeline and embedding similarity model to identify cattle from images. - Implemented a Flask REST API with MongoDB integration and deployed the system on the cloud for real-time biometric recognition.	

PROJECTS

CATTLE MUZZLE BIOMETRIC IDENTIFICATION SYSTEM LINK	FEBRUARY 2026
- Developed an AI-powered cattle identification system using muzzle biometric patterns for livestock recognition. - Built a YOLOv8-based muzzle detection pipeline to automatically crop muzzle regions from cattle images. - Implemented a ResNet50-based embedding model with feature extraction and similarity matching for cattle identification and verification. - Applied image preprocessing techniques including CLAHE enhancement and sharpening to improve feature quality and model performance. - Developed a Flask REST API with database integration for real-time cattle registration and identification.	
TANGLISH HATE SPEECH DETECTION SYSTEM LINK	NOVEMBER 2025
- Developed a multilingual hate speech detection system for Tanglish (Tamil written in English script) social media content. - Fine-tuned XLM-RoBERTa transformer models to classify hate speech, offensive language, and safe content. - Built a real-time moderation pipeline capable of analyzing user-generated content and flagging harmful messages. - Integrated the model into an interactive Gradio application and deployed it using Hugging Face Spaces.	

CERTIFICATIONS

EXECUTIVE POST GRADUATE CERTIFICATION IN DATA SCIENCE AND AI IIT ROORKEE CERTIFICATE	APRIL 2025
Gained advanced expertise in machine learning, deep learning, and AI-driven analytics, with hands-on project experience.	
DATA SCIENCE COURSE (INTELLIPAAT) CERTIFICATE	FEBRRUARY 2025
Hands-on experience in data preprocessing, feature engineering, model training, and evaluation using Python.	
SQL COURSE (INTELLIPAAT) CERTIFICATE	JULY 2024
Mastered Worked with relational databases, writing optimized SQL queries for data retrieval and analysis.
